dominant segment
for this area

In this area

100.0%

of households fall
into this segment

In the United States

1.3%

of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Families in this urban segment may be non-traditional; however, their religious faith and family values guide their modest lifestyles. Many residents are primary caregivers to their elderly family members. Jobs are not always easy to come by, but wages and salary income are still the main sources of income for most households. Reliance on Social Security and public assistance income is necessary to support single-parent and multi-generational families. High poverty rates in this market make it difficult to make ends meet. Nonetheless, rents are relatively low. Public transportation is available, and Medicaid can assist families in need.

Our Neighborhood

- Households are single person or single parent (usually female householders). Multigenerational families are also present. Homes are predominantly single family; values reflect the age of the housing, built more than 60 years ago. Over half of the homes are renter occupied; average rent is lower than the US average. Most households have one car (or no vehicle); nearly a third rely on carpooling, walking, biking or public transportation.

Socioeconomic Traits

- Almost a quarter of adults aged 25 or more have no high school diploma. Labor force participation is 50%. Income is less than half of the US median income. Consumers in this market consider traditional gender roles and religious faith very important. This market lives for today, choosing to save only for a specific purpose. Consumers favor TV as their media of choice and will purchase a product with a celebrity endorsement.

Market Profile

- Consumers shop at warehouse clubs and low-cost retailers. Unlikely to own a credit card, pay bills in person. This market supports multigenerational families; are often primary caregivers for elderly family members. Listen to gospel and R&B music. Enjoy playing and watching basketball.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2021. Update Frequency: Annually.

About RPR (Realtors Property Resource)

- Realtors Property Resource® is a wholly owned subsidiary of the National Association REALTORS®.
- RPR offers comprehensive data – including a nationwide database of 164 million properties – as well as powerful analytics and dynamic reports exclusively for members of the NAR.
- RPR's focus is giving residential and commercial real estate practitioners, brokers, and MLS and Association staff the tools they need to serve their clients.
- This report has been provided to you by a member of the NAR.

About RPR's Data

RPR generates and compiles real estate and other data from a vast array of sources. The data contained in your report includes some or all of the following:

- **Listing data** from our partner MLSs and CIEs, and related calculations, like estimated value for a property or median sales price for a local market.
- **Public records data** including tax, assessment, and deed information. Foreclosure and distressed data from public records.
- **Market conditions and forecasts** based on listing and public records data.
- **Census and employment data** from the U.S. Census and the U.S. Bureau of Labor Statistics.
- **Demographics and trends data** from Esri. The data in commercial and economic reports includes Tapestry Segmentation, which classifies U.S. residential neighborhoods into unique market segments based on socioeconomic and demographic characteristics.
- **Business data** including consumer expenditures, commercial market potential, retail marketplace, SIC and NAICS business information, and banking potential data from Esri.
- **School data and reviews** from Niche.
- **Specialty data sets** such as walkability scores, traffic counts and flood zones.

Update Frequency

- Listings and public records data are updated on a continuous basis.
- Charts and statistics calculated from listing and public records data are refreshed monthly.
- Other data sets range from daily to annual updates.
